

Agilent HSMx-C540

Oval Lens High Performance Surface Mount LEDs

Data Sheet

LED Part Numbers HSMA-C540, HSMC-C540, HSMM-C540, HSMN-C540, HSMU-C540, HSMZ-C540

Description

These high performance HSMx-C540 surface mount LEDs are specifically designed for indoor full color signs and passenger information signs. The oval shaped radiation pattern (40° x 100°) and high luminous intensity ensure that these devices are excellent for wide field of view indoor applications.

These lamps have a very smooth matched radiation pattern that ensures consistent color mixing in full color applications, and message uniformity across the viewing angle of the sign.

High efficiency LED dice are used in these LED components. InGaN (Indium Gallium Nitride) for green and blue and AlInGaP (Aluminium Indium Gallium Phosphide) for red

and amber are capable of producing high light output.

The HSMx-C540 has an industry standard 2.0 x 1.25 mm footprint that is excellent for all-around use.

These solid state surface mount LEDs are designed with a reflector cup and oval shape dome which provides directional lighting. The reflector cup focuses the light more efficiently to provide higher intensity compared to a nonreflector cup equivalent part. The oval dome produces oval radiation pattern for wide field of view indoor applications.

All packages are compatible with IR soldering process and are shipped in tape and reel with 3000 units per reel.

Features

- Super wide viewing angle
Major axis 100°
Minor axis 40°
- Smooth, consistent spatial radiation pattern
- Small 2.0 x 1.25 mm footprint
- High luminous output
- Compatible with IR solder reflow
- Colors available: 626/629 nm red, 590 nm amber, 525 nm green, 470 nm blue
- Available in 8 mm tape on 7" (178 mm) diameter reels
- Tinted, non-diffused epoxy

Applications

- Indoor full color sign
- Commercial indoor advertising
- Indoor variable message sign
- Status indication
- Front panel indicator

Benefits

- Viewing angle designed for wide field of view application
- Red, green, blue radiation patterns matched for indoor full color signs
- Small package footprint enables small pitch size for full color signs
- Superior for indoor full color signs

CAUTION: HSMM-C540 and HSMN-C540 LEDs are Class 1 ESD sensitive. Please observe appropriate precautions during handling and processing. Refer to Agilent Technologies Application Note AN-1142 for additional details.

Notes:

1. The luminous intensity, I_V, is measured at the peak of the spatial radiation pattern, which may not be aligned with the mechanical axis of the lamp package.
2. The dominant wavelength, λ_d, is derived from the CIE Chromaticity Diagram and represents the perceived color of the device.
3. θ_{1/2} is the off-axis angle where the luminous intensity is 1/2 the peak intensity.

Convective IR Reflow Soldering

For more information on soldering and pick and place, refer to Application Note 1060, *Surface Mounting SMT LED Indicator Components* and Application Note 1217 *Pick and Place and Soldering of the Agilent HSMx-C540, HSMx-C220 Surface Mount LEDs* respectively.

Storage Condition: 5 to 30° C @ 60% RH max.

Baking is required under the condition:

- the blue silica gel indicator becoming white/transparent color
- the pack has been opened for more than 1 week

Baking recommended condition: 60 \pm 5° C for 20 hours.
