

THAT 202XT, 202XTC, 202R

FEATURES

- Wide Dynamic Range: >124 dB
- Wide Gain Range: > 130 dB
- Logarithmic Gain Control
- Very Low Distortion: (0.003% @0 dB gain, 0.02% @20dB gain)
- Temperature Compensated (202XTC)
- Package Compatible with dbx 202

APPLICATIONS

- Faders
- Console Automation
- Panners
- Compressors
- Expanders
- Filters
- Oscillators

Description

The **THAT 202XT, 202XTC and 202R2** modular voltage-controlled amplifiers (VCAs) are extremely high performance current-in/current-out devices with negative-sense control ports. Intended for the most demanding of applications, these parts require almost no external support circuitry and are packaged on small, 1" X 2" circuit boards. Their pin configurations are identical to that of the original dbx 202 VCA, as well as later dbx models 202C, 202X, 202XL and 2001. The **202XTC** has a control constant of -20dB/Volt, and is internally tempera-

ture compensated for very low thermal drift. The **202XTC** is recommended for all new designs. The **202XT** is intended to replace a dbx 202C, 202X or 202XL in designs where control-voltage temperature compensation was provided externally. Like the 202C, -X and -XL, the **202XT** has a control constant of -20dB/Volt, with a predictable +0.33%/°C temperature drift. The **202R** is intended to replace the original dbx 202. The **202R** matches the dbx 202's control sensitivity of -6mV/dB and its predictable +0.33%/°C temperature drift

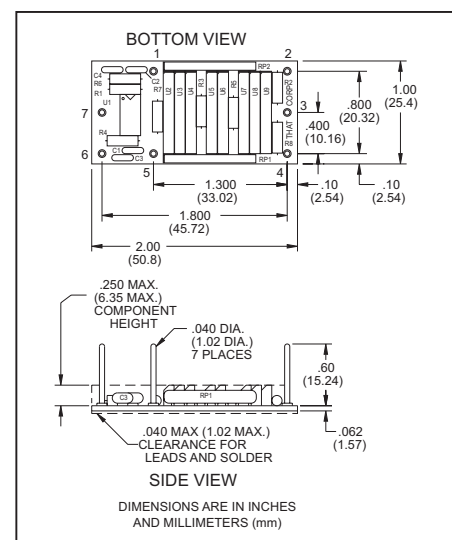

Figure 2. 202XT, 202R, 202XTC Physical Outline

SPECIFICATIONS¹

Absolute-Maximum Ratings ($T_A = 25^\circ\text{C}$)

Positive Supply Voltage (V_{CC})	+18 V	Power Dissipation (P_D)	1.5 W
Negative Supply Voltage (V_{EE})	-18 V	Operating Temperature Range (T_{OP})	-20 to $+75^\circ\text{C}$
Supply Current (I_{CC})	40 mA	Storage Temperature Range (T_{ST})	-40 to $+125^\circ\text{C}$

Recommended Operating Conditions

Parameter	Symbol	Conditions	<u>202XT</u>			<u>202R</u>			<u>202XTC</u>			Units
			Min	Typ	Max	Min	Typ	Max	Min	Typ	Max	
Positive Supply Voltage	V_{CC}		+12	+15	+16	12	+15	+16	+12	+15	+16	V
Negative Supply Voltage	V_{EE}		12	-15	-16	-12	-15	-16	-12	-15	-16	V
Signal Current		$V_{CC} = -V_{EE} = 15\text{ V}$	—	1.4	6.0	—	1.4	6.0	—	1.4	6.0	mA

Electrical Characteristics²

Parameter	Symbol	Conditions	<u>202XT</u>			<u>202R</u>			<u>202XTC</u>			Units
